

## Location of backups

All backups are written into the centralized backup directory on LUCY server. The backups can be accessed within the support menu (/support/backups):

## Downloading a backup

You can download the according backing by clicking on the backup date:

## Backup a mail or web template

All Templates (Email, Web, Scenario & e-learning) can saved or restored using the Backup/Restore function with the corresponding Menu item.

Example: Backup & Restore Scenario Templates

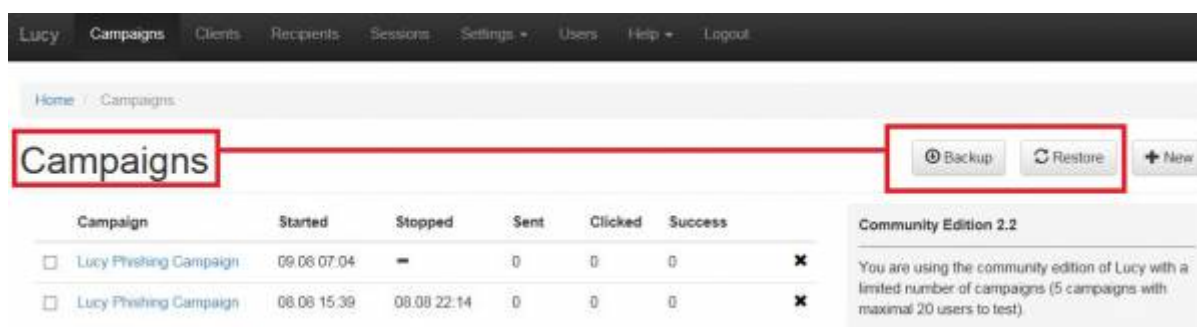

**Note:** please make sure that if you restore a template, that you don't change the naming convention of the archive nor extract any file before restoring it. A backup archive has a syntax like: "2017-09-07-awareness-templates.zip". That exact file should be shared between Lucy instances.

## Backup your campaign

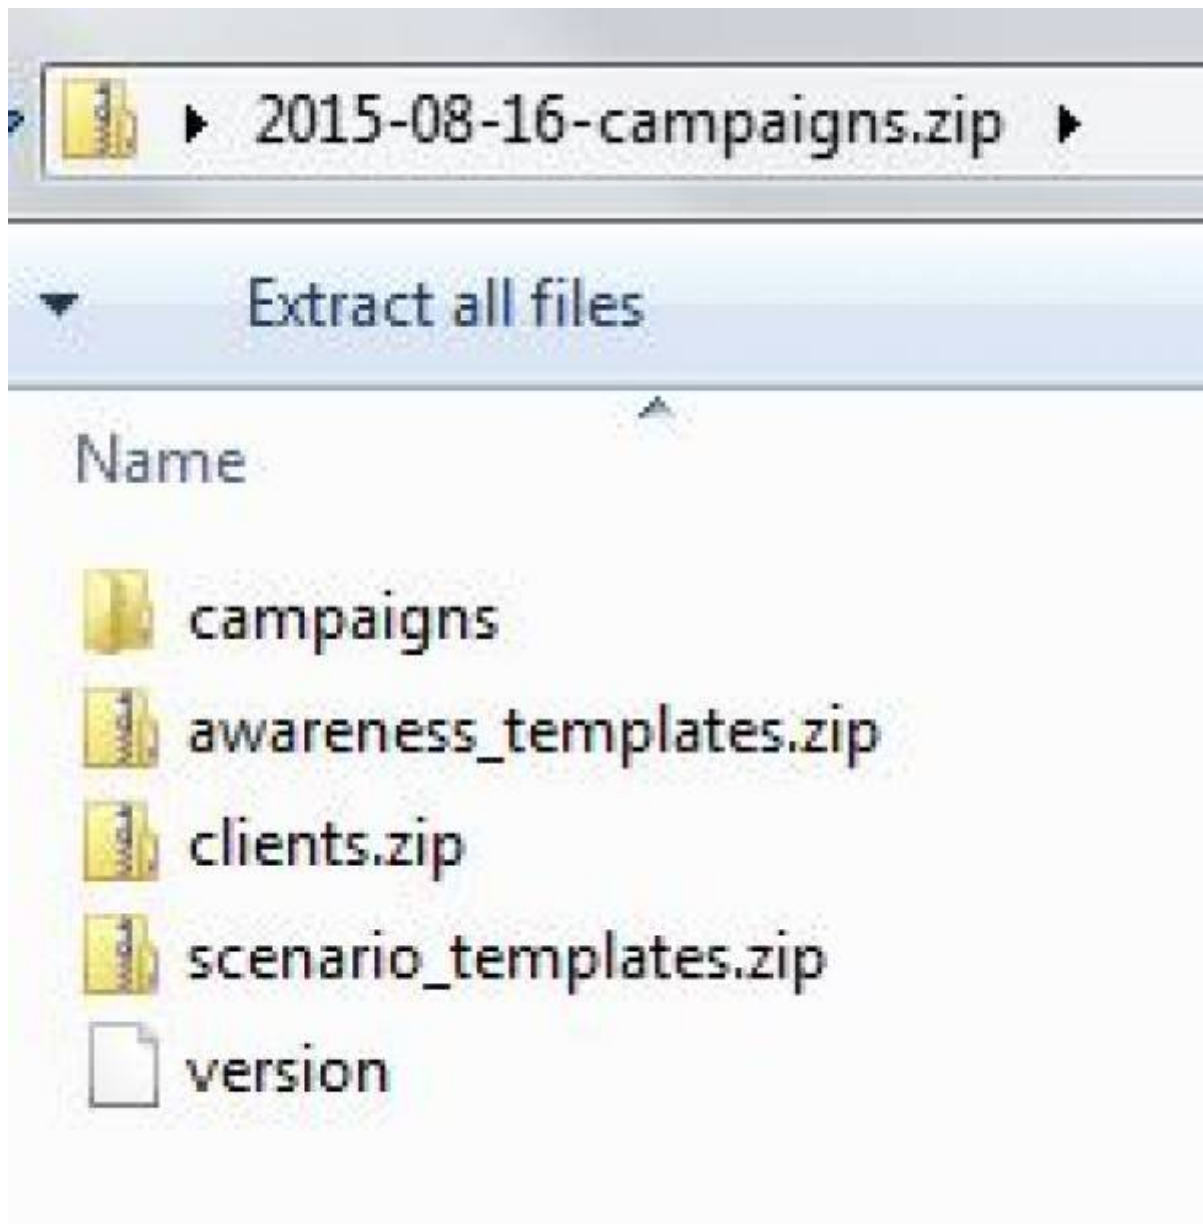

You can either backup your campaign or as well create an identical copy of an existing campaign with the backup/restore function (if you don't delete the original campaign and restore your campaign a copy will be created).

Example: Backup & Restore Campaigns

During a Campaign Backup the Following Data Is Saved:

- Campaign Configuration (all settings)
- Email Template
- Landing Page Template
- Awareness Site Template
- Campaign Stats (from LUCY v. 2.8 on)

## Copy a campaign

LUCY > 3.0 allows you to quickly copy a campaign using the copy button. To copy a campaign first select the checkbox of the campaign(s) that you want to copy and then click "copy". LUCY will create a 1:1 copy of your complete campaign and add a number next to the campaign name:

The screenshot shows the 'Campaigns' page in the Lucy interface. At the top, there's a navigation bar with 'Lucy', 'Campaigns', 'Recipients', 'Sessions', 'Settings', 'Support', 'Status', and 'Logout'. Below this, a breadcrumb trail shows 'Home / Campaigns'. The main heading is 'Campaigns'. To the right of the heading are buttons: '+ New', 'Copy' (highlighted with a red box), 'Backup', and 'Restore'. Below the heading is a table of campaigns. The first row, 'Lucy Phishing Campaign', has its checkbox selected (highlighted with a red box). The second row, 'Lucy Phishing Campaign (1)', also has its checkbox selected (highlighted with a red box). A red line connects the 'Copy' button to the 'Lucy Phishing Campaign (1)' row. To the right of the table is a 'News' section with three items: '21.03.2016 Lucy 2.9.1', '17.03.2016 Lucy 2.9', and '16.02.2016 Reboot After Update to 2.8'. At the bottom left, it says 'Copyright © 2016 Lucy 3.0 All Rights Reserved'.

Campaign	Started	Stopped	Sent	Clicked	Success	
<input checked="" type="checkbox"/> Lucy Phishing Campaign	—	—	0	0	0	×
<input type="checkbox"/> macro ▶	07.06 10:11	—	3	1	0	×
<input type="checkbox"/> java	—	—	0	0	0	×
<input checked="" type="checkbox"/> Lucy Phishing Campaign (1)	07.06 08:04	07.06 08:04	1	0	0	×
<input type="checkbox"/> awa	—	—	0	0	0	×
<input type="checkbox"/> macro (copy)	06.06 17:34	—	2	1	0	×
<input type="checkbox"/> LHCF ▶	07.06 08:42	—	0	0	0	×
<input type="checkbox"/> Awareness Only	—	—	0	0	0	×

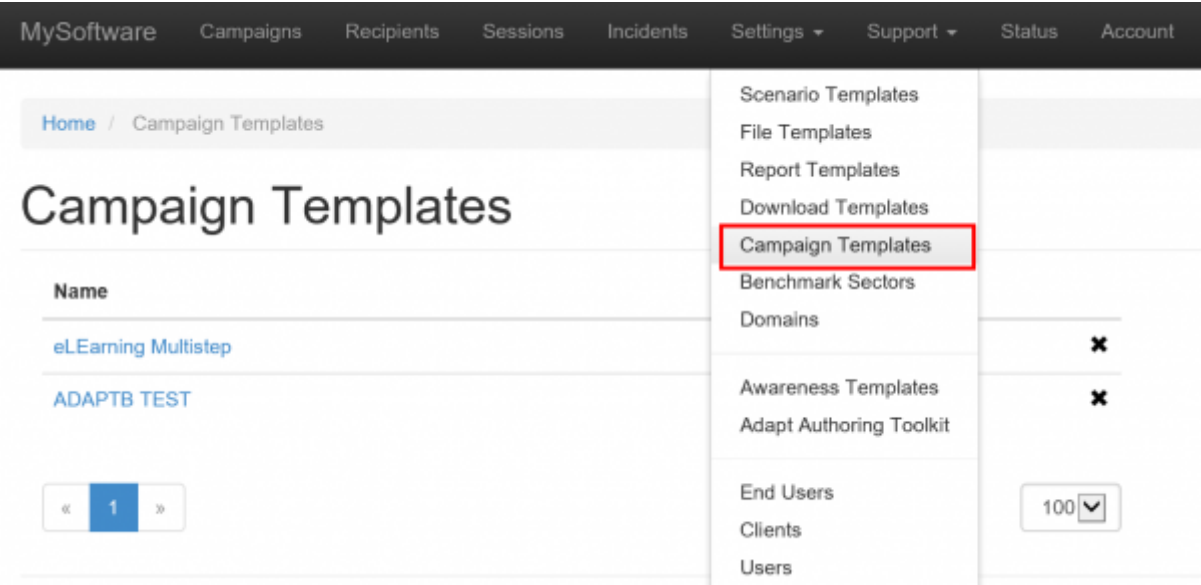

## Create a new campaign based on a previous campaign template

Create a new campaign based on a previous campaign template: LUCY now allows an administrator to create a template based on a previous campaign. The template consists of all settings including all associated scenario and awareness templates. You can then start a new campaign, using this campaign template

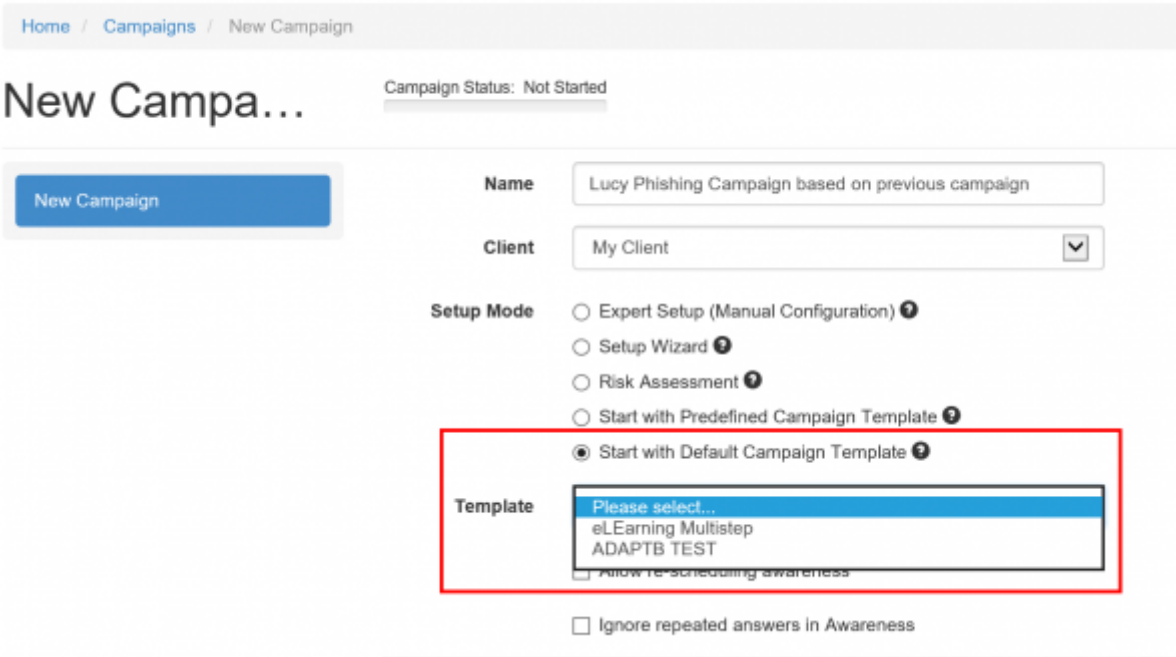

You can create a new template by clicking "save as template" in the campaign summary page:

The screenshot shows the 'ADAPT B TEST' campaign summary page. At the top, there's a navigation bar with 'Home / Campaigns / ADAPT B TEST'. Below this, the campaign name 'ADAPT B TEST' is displayed. To the right of the name are buttons: 'Reset Stats', 'Report', 'Save as Template' (highlighted with a red box), 'Export', and 'Start'. Below the buttons is a table with three columns: 'Campaign', 'Running Time', and 'Created By'. The table contains one row: 'ADAPT B TEST', '45 seconds', and 'oliver@muanchow.ch'. Below the table is a 'Results' section with a sidebar containing 'Summary', 'Statistics', 'Reports', and 'Exports'. The main content area shows 'Attack Overview' with three circular progress indicators: the first is blue with '2', the second is black with '0', and the third is black with '0'. To the right is an 'Awareness' section with a circular progress indicator showing a green segment.

You find the campaign template on the campaign template settings page:

If you start a new campaign, you can then select one of your previously saved campaign templates. Please select "Start with Default Campaign Template" to get in the according menu:

KNOWN ISSUES

Certain data is cross referenced (e.g. recipient group name). So if you delete that group or copy that backup to a fresh LUCY install, make sure the exact same group name exists. Other data (e.g. your custom landing page, etc. is fully backed up in the ZIP file). The Backup/Restore only works without issues using the same version. You cannot restore campaign data from a lower version into a LUCY with a higher version. Therefore, you need to make sure that you first [Update LUCY](#) to the latest version before backing up your campaign data.
