

# Creating an awareness campaign without a phishing simulation

LUCY allows you to give users access to elearning, without any attack simulation:

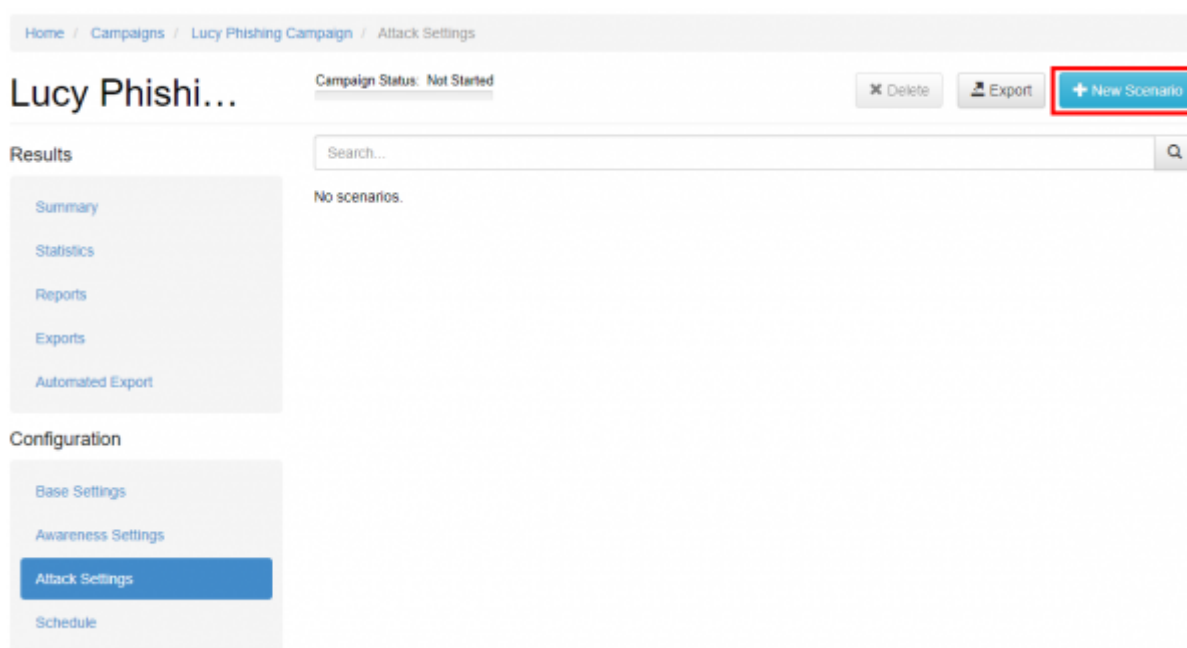

1. Using the awareness only template
2. Using the group mappings

## Awareness only template

In LUCY > 3.0 you have under scenario templates a default template called awareness only:

This default template can be added within a scenario:

It will allow you to select and configure a specific [awareness template](#) which you can associate with

your campaign:

The screenshot shows the 'New Awareness' campaign creation interface. At the top, there's a breadcrumb trail: Home / Campaigns / Awareness Only Campaign / Awareness Settings / New Awareness. The main title is 'Lucy - Awar...'. Below it, the 'Campaign Status' is 'Not Started' with a play button icon. A button labeled 'Adapt Authoring Tool' is in the top right. The form fields include: 'Name' (text input), 'Type' (dropdown menu set to 'Lucy-Based Website'), 'Template' (dropdown menu with 'N/A' and a 'Selected Template' button highlighted with a red box), 'Languages' (dropdown menu set to 'English' with an 'Add' button), and a checkbox for 'Website Enabled'. Below these, 'Page Views' is shown as '0' and another checkbox for 'Add Recommended Domains'. A 'Save' button is at the bottom.

The screenshot shows the 'Website Template' selection screen. The breadcrumb trail is: Home / Campaigns / Awareness Only Campaign / Awareness Settings / Website Template. The main title is 'Lucy - Awar...'. Below it, the 'Campaign Status' is 'Not Started' with a play button icon. A button labeled 'New Awareness' is on the left. The main text says: 'Choose one of the templates below to start with. You will be able to customize the template later. Didn't find the content you were looking for or maybe need a different language? Please contact us and let us help you customize your campaign.' There are three template cards. The first card is titled 'Adapt Test' and has a date of '02.02.2018 11:13'. The second card is titled 'Avoid & Recognize Phishing Attacks (V 2.2)' and has a date of '11.01.2018 21:54'. The third card is titled 'Avoid & Recognize Phishing Attacks (Version 2.0)' and has a date of '13.09.2017 01:53'. Each card has a 'Preview Website' button, a 'Preview E-mail' button, and a 'Use' button. The 'Use' button for the third card is highlighted with a red box.

**Note:** please consult [this page](#) to understand how to create & edit an existing interactive eLearning template.

## Group mappings

When you create a campaign and associate a group to it, you will see a dropdown menu that allows you do map the group with the according campaign type. You have 3 options:

- Awareness only
- Attack only

- Attack & Awareness

If you add a group and choose the mapping "awareness", then the users from this group will only get the mail with the awareness content delivered:

Home / Campaigns / Phishing & elearning / Recipients / Add Group

Phishing &...
