Your Profile & reach.	Confirmation Social Media Profile (V2.2) A social media provider informs the recipient that a profile under his/her name has been created. The user can download a Word file that appears to be a CV. The Word file theil contains a macro through which you can track if the file has been opened.	If you wish to edit a template for a specific campaign only, you need to edit the landing page and e-mail within the campaign base settings.

All new templates will be published in English first. They will then be translated into the following primary LUCY languages within a period of 6-8 weeks:

- German
- Spanish
- French
- Italian
- Portuguese

Secondary languages (languages that have a lower priority and therefore are translated only after 3-4 months) are:

- Dutch
- Turkish
- Danish
- Chinese (Traditional)
- Arabic
- Japanese
- Russian

Other languages can be done on request. Lucy offers the possibility to add a new language to each

template within seconds:

Configuration

Introduction: If you create a campaign and want your employees to get the correct language, you won't need to create a separate scenario for each language. LUCY has the ability to dynamically send the correct language template to the recipient, if you have defined the language for each employee in the recipient settings.

Step 1: upload a recipient group, where you have the correct language associated with each recipient. The language must be specified in English within the recipient list (if you want a recipient to get a german template, his language attribute must be "german" and NOT "deutsch"). If you don't specify a language with the recipient, he will get the base language that was selected when adding a new scenario.

Scenario Settings	Name	test	
Mail Settings	Domain	security-verification.xyz	~
SSL Settings	\mathbf{X}		
Landing Page Template	Subdomain	test	
Message Template	Languages	sa English	×
Errors		German	×

Step 4: When you edit the landing page or edit the message template you will see a drop down menu appearing at the top with the additional language you added in the previous step. If the template is already available in the desired language, the according content will be appear once you to select the language. If there is no template with the desired language, you will need to create the template yourself first.
