

DLP STRING

DLP String option allows to insert specific data into email body. Enable this feature to classify emails. DLP data can contain such data as:

- Recipient Email
- Email's SHA256 hash
- Victim ID
- Campaign ID

DLP String option can be enabled in the Settings → Advanced settings.

Use DLP Activation String Enable DLP String ⓘ

Use DLP String to Define Simulation Reports

DLP String Preview

Email: preview@test.com Hash: 3YAmRcv6RkpMBN2E6+Y7ghWeNuTbc90DL8LFY3aFggQdIgold1Un4aZoPbReh Victim ID: 1 Campaign ID: %campaign_id%

Enable this feature if it is necessary to sort victims' replies in the [Mail Manager](#) by folders.

It is possible to make the DLP string invisible. To do this, simply set DLP String Font Size to 0px. As soon as enabled, DLP string will be inserted to every email sent from LUCY.
