%awareness.website%	
%awareness.mail%	Dear John Doe, We sent an email to a number of employees this morning. The goal of this email was to test the behaviour of our employees upon receipt of a "phishing email." A phishing email is one that may look proper and official (but isn't) and requests that the user do something or give information. It seems that you did not spot the scam. Only working together can we keep our IT security at a high level. If you want to improve your know-how in detecting phishing attacks, visit our short training here. Kind Regards, Your Name Your company
%message.screen%	Dear John Doe, Thanks again for reserving a domain with the following parameters with our hosting services: • John Doe • test@test.com We already created your personal profile page with the content that has been uploaded. Please take a moment to verify the profile page quickly. If we don't hear from you within the next 5 days we will publish the page. Domain Registration Services  Domain Registration AG Darmtorstraße 30 9001 St. Gallen USA Tel.: +41 71 419 131-0 Fax: +41 71 419 131-11 E-Mail: info@domainsregistration.ch

Tables & Lists

Variable	Example
%system.info%	**Campaign Status** Campaign: Plugin test Started at: 21.12.2018 11:33:01 Stopped at: 24.12.2018 08:55:54 Notes: — **Campaign Scenarios** Scenario: phish Template: Bookling (Petya Ransomware) ver.2.2 The recipient gets a booking confirmation "Your Booking Berlin Novut Hotel is confirmed". After the link click the user gets redirected to a landing page where he can authenticate with his credentials and download an Word Document. The Word File is required to cancel the reservation and refund the money. Office files containing a Macro are the typical entry point for malware (seen in attacks like Petya). Domain: 192.168.60.129 SSL: No E-Mail: Serge <serge@sendgrid.net> Random E-mail: No Forward E-mail: Subject: Your Booking "Berlin Novut Hotel" is confirmed Collect Data: Partial Redirect URL: — Double Barrel: No Regexp: Login Regexp: \w.*\w Password Regexp: — • E-Mails Sent: 1 / 2 (50.00%) • Clicks: 1 / 2 (50.00%) • Successful Attacks: 0 / 2 (0.00%) • 50.00% of all users has clicked the link • 0.00% of all users has been attacked successfully (submitted their password, opened an attachment, etc)
