

Introduction: Exporting data into groups or files

In the LUCY there's a navigation item called export within the campaign overview page. The menu that opens allows you to export any campaign-related data:

[Home](#) / [Campaigns](#) / [Lucy Phishing Campaign](#) / [Exports](#)

49 new templates available!
[Download](#)

Lucy Phishi...

Campaign Status: Not Started ▶

Results

- Summary
- Statistics
- Reports
- Exports**

Action	Type	Filter / Details
1	Recipients	All
2	Recipients	Succeeded to Group
3	Recipients	Export recipients within submitted time range to a new group
4	Benchmark	Export campaign benchmark results
5	Collected Data	Export collected data

Configuration

- Base Settings

You can either export **ALL data that gets monitored** in LUCY or only specific data:

Lucy Phishi...

Export into CSV

🔔 Reports in the CSV format are generated using the separator specified in the Advanced Settings section. The default separator is a tabulation. Please consider this when opening CSV files - in some versions of Excel you may need to manually specify the type of separator when opening the file.

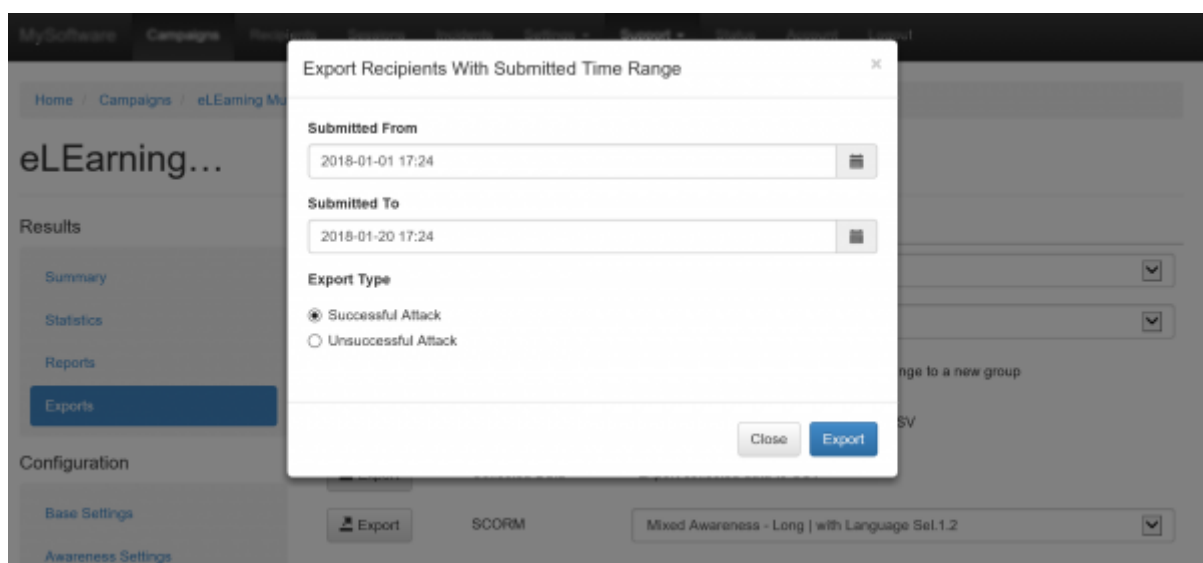

- **Export recipients to CSV (1)**: allows to export recipients to a CSV file (can be opened in excel) based on different criteria

- **Export benchmarks (4):** This will export the main statistics (scenario name, number of messages_sent, mails_opened, clicks & succeeded) to a CSV. If you want to export ALL data, please use "Export recipients to CSV" and select "ALL".
- **Export collected data to CSV (5):** export the data collected (any submitted data or file uploads from malware simulations) in the campaign to a CSV

Export into groups

- **Export recipients to groups (2):** this feature allows you to create new groups. Once you click the export button LUCY will create a new group within the recipients navigation tab that contains the according users. Those groups can then be used for further specific campaigns
- **Export recipients within submitted time range to a new group (3):** using this function you can export recipients in a new group using a specific time range

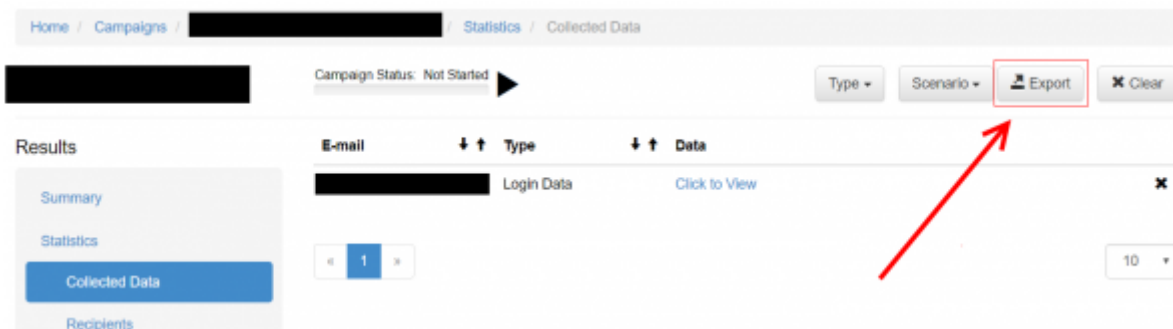

Alternative: Export via API

Beside manual exports, you can use also our API to fetch all data. More details [here](#)

Export Logins

All collected data can be exported. Go to statistics/collected data and then click "export:
