

Export & Restore a template from the generic template section

The generic templates are located settings/templates. If you backup a template using the backup feature, only the template gets exported. No application settings or any personal campaign data will be included.

Create a template backup

Step 1: Select the attack- or awareness template you want to export (1)

Step 2: Under "actions" please click on "backup" (2)

Restore the template

Step 1: Once you clicked the "backup" button, the template will be archived under /support/backups. Please download the the template to a local device. You can download the template by clicking on the date/time:

Backups

Time	Type	Size	Status
07.10.2019 10:00:15	Awareness Template	15.90 Mb	✓

Step 2: You can restore the template on any LUCY server by clicking on the restore button:
