Install LUCY on Windows

LUCY only supports Linux operating systems.
There are several options for installing LUCY on Windows as a virtual machine:

- [1] Docker for Windows
- VMware Workstation Player for Windows
- Oracle VM VirtualBox for Windows

Note that Docker Desktop for Windows requires the following options to be enabled:

- Virtualization
- Hyper-V

 Keep in mind that while Hyper-V is installed and enabled you would not be able to run VMware or VirtualBox images.

[1]
Use install.sh command, learn more here.
