Lucy comes with various log files that can be accessed through the web gui. Here are a few examples:

## System Logs (Apache Error Log, Apache Access Log & Postfix Mail Log)

The system logs can be found under admin/help/servicelogs within the web gui.

## Application Logs (Lucy specific logs)

Within the send log function (admin/help/logs) you have a download button that allows you to

download all LUCY related log files.

## **Campaign Logs**

Within the campaign you can use the dashboard with its <u>campaign monitoring</u> to track all activities or use the <u>reporting</u> to export the campaign data. Other than that you have as well some campaign specific error logs you can access:

Summary			$\frown$	$\frown$
User Settings	0	) .	( ○ ) →	
Statistics			$\bigcirc$	$\bigcirc$
Recipients	Hig O messages	hcharts.com	Highcharts.com 0% of recipients clicked the link	Highcharts.com 0% of attacks are successful
Base Settings			IIIK	Succession
Schedule	Messages Sent	0 of 3		0.00%
Awareness Website	Clicks	0 of 3		0.00%
	Successful Attacks	0 of 3		0.00%
Reports	Vulnerable Victims	0 of 3		0.00%
Checks				
Message Log				
Errors				

- Message log: contains all messages that have been successfully transmitted by LUCY
- Error log: contains all errors related to the campaign specific message transmission

## **Status logs**

Under /admin/help/status LUCY keeps track of all user activities. You can filter for a specific date range. Each activity has a link. Details are visible when you click on the link. Example:

tatus						A Export	C Clea
