

LUCY offers you to restore the passwords generated by the user or the system in different ways:

- **Root Password:** this can be restored only within the [setup script](#) or [starting LUCY in recovery mode](#)
- **System User (SSH) "Phishing":** this user is allowed to access the setup script. The password to this user can be [restored within the GUI](#)
- **Web User:** in LUCY > 3.1 the user is able to restore his password via e-mail by clicking on the "Forgot?" link within the login:

Lucy Login
