LUCY offers you to restore the passwords generated by the user or the system in different ways:

- **Root Password**: this can be restored only within the setup script or starting LUCY in recovery mode
- **System User (SSH) "Phishing":** this user is allowed to access the setup script. The password to this user can be restored within the GUI
- **Web User**: in LUCY > 3.1 the user is able to restore his password via e-mail by clicking on the "Forgot?" link within the login:

This will initiate an e-mail that allows the user to set a new password:
