

Protect a campaign against accidental deletion

In case if it is required to protect a campaign from accidental deletion, please go to the base settings of a campaign and activate the corresponding option. Then save the change by hitting the “Save” button.

The screenshot shows the configuration page for a campaign named "Lucy Phishing Campaign". The interface includes a sidebar with navigation options: Results (Summary, Statistics, Reports, Exports), Configuration (Base Settings, Awareness Settings, Schedule, Recipients), Advanced Settings (User Settings, Custom Fields, Reminders), and Logs (Supervision Log, Message Log, Errors). The main content area shows various settings, including "Enduser Profiles Enabled", "Track Responses", "Email Tracking", "Antivirus/Firewall Protection Interval" (set to "off"), "Allow Awareness Rescheduling", "Ignore repeated answers in awareness", "Stop the Campaign Automatically", "After I stop the campaign, send me a report to default@user.com", "Pinned", "Delete Protection" (checked and highlighted with a red box), and "Enable Anonymous Mode". A "Save" button is located at the bottom of the settings area.
