

Simultaneous attack template usage (activation/deactivation)

LUCY gives you the option to use multiple simulated attack templates in a single campaign. Combine different types (hyperlink, file based etc) with different attack themes to achieve the largest possible risk coverage and a better understanding of employee vulnerabilities. Combined with our scheduling randomizer, complex attack patterns can be executed over a longer period of time.

If you add multiple scenario templates to your campaign, you see them listed in your base settings at the bottom. If you do not want to use a scenario within a campaign temporarily, you can deactivate it instead of deleting it. This is done by selecting the appropriate checkbox. Please save the changes after you have made your selection.

The screenshot displays the 'Base Settings' section of the LUCY application. On the left, a sidebar contains navigation links: 'Base Settings' (highlighted), 'Awareness Settings', 'Schedule', 'Recipients', 'Advanced Settings', 'User Settings', 'Custom Fields', 'Reminders', 'Logs', 'Supervision Log', 'Message Log', and 'Errors'. The main content area shows various settings including 'Enduser Profiles Enabled', 'Email Tracking', 'Antivirus/Firewall Protection Interval' (set to 'off'), 'Allow Awareness Rescheduling', 'Ignore repeated answers in Awareness', 'After I stop the campaign, send me a report to oliver@muenchow.ch', and 'Pinned'. A 'Save' button is located below these settings. At the bottom, a table lists attack templates. The table has columns for 'Scenario', 'Template', 'Type', and 'Active'. The 'Active' column contains checkboxes, with the first one checked and the second one unchecked. A red box highlights the 'Active' column header and the checkboxes. A 'Delete' button is visible in the top right corner of the table area.

Scenario	Template	Type	Active
<input type="checkbox"/> test	Edit Scenario Settings Cisco WebEx Meeting (Version v. 2.1) / English	Hyperlink	<input checked="" type="checkbox"/>
<input type="checkbox"/> Iphone	Edit Scenario Settings Contest II - Win an iPHONE 8 v1.1 / English	Web Based	<input type="checkbox"/>
