

In order to be able to start a USB attack you need to:

- a) create a [new campaign](#) that has no other scenarios associated than the USB scenario
- b) create a recipient group that contains only USB sticks (it must not have regular users). The group should look something similar to the following example:

Home / Recipients / New Group

New Group

Name

USB Attack ⓘ

Number of USB Sticks

Home / Recipients / USB

USB

Name
USB Stick 1
USB Stick 2
USB Stick 3
USB Stick 4
