

In order to be able to start a USB attack you need to:

a) create a **new campaign** that has no other scenarios associated than the USB scenario b) create a recipient group that contains only USB sticks (it must not have regular users). The group should look something similar to the following example:

The screenshot shows the 'New Group' form in the LUCY interface. The form has a 'Name' field with 'USB' entered, a 'Number of USB sticks' field with '4' entered, and a 'Save' button. Below the form is a table showing the group details.

Scenario	Name	Number of USB sticks
USB	USB Stick 1	1
USB	USB Stick 2	1
USB	USB Stick 3	1
USB	USB Stick 4	1
