

In the Settings Menu, you can specify an external mail server or web proxy. LUCY allows you to specify the server's address and port together with login information (if needed):

Home / Settings

Settings

Time Zone

UTC+01:00 - Zurich ▼

☒ Use Proxy ?

Proxy Host

Proxy Port

Proxy Login

Proxy Password

☒ External SMTP Relay ?

SMTP Host

SMTP Port

☐ Use SSL

SMTP Login

SMTP Password

Save

Note: LUCY comes with a build in mail server. So it is not necessary to define an external mail relay!

If you want to use an external mail server please consult this chapter:

http://phishing-server.com/PS/doc/dokuwiki/doku.php?id=mail_delivery_methods_in_lucy
