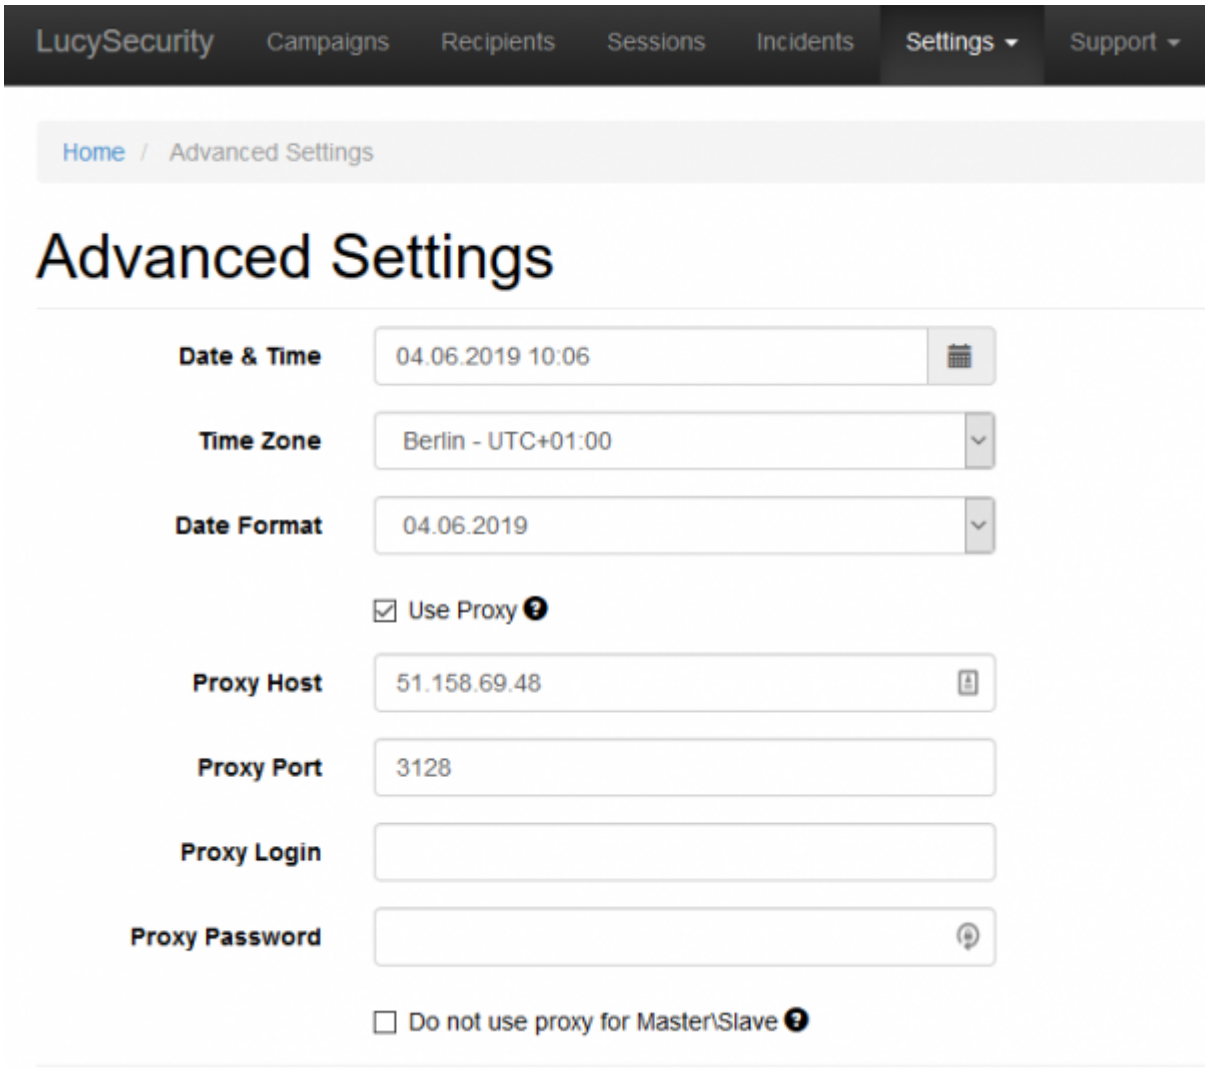
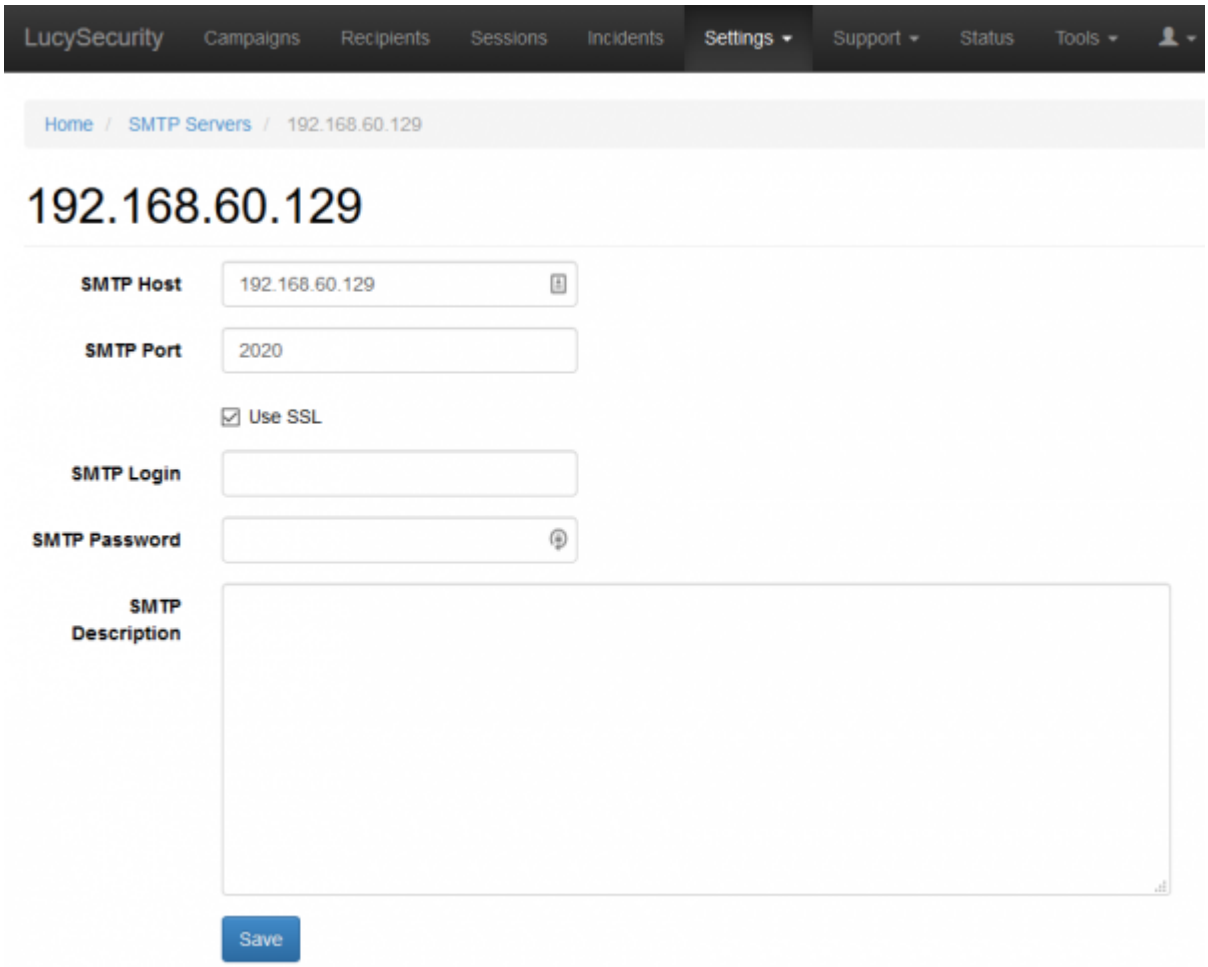
In the "Advanced Settings" Menu, you can specify a web proxy. You can choose the external mail server in "SMTP servers". LUCY allows you to specify the server's address and port together with login information (if needed):





Note: LUCY comes with a built-in mail server. So it is not necessary to define an external mail relay!

If you want to use an external mail server please consult this chapter:
http://phishing-server.com/PS/doc/dokuwiki/doku.php?id=mail_delivery_methods_in_lucy

Troubleshooting

- Emails do not arrive
- Emails arrive delayed
- Emails are not send
- Not all mails are send
